

TIER 3 PUBLIC NOTICE

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Spanish Trail Water

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During July – September 2022 we did not complete all monitoring or testing for Stage 2 Disinfection Byproducts and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year; how often we are supposed to sample and how many samples we are supposed to take; how many samples we took; when samples should have been taken; and the date on which follow-up samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
Total Trihalomethanes (TTHM)	2 sample every year	1	July 2022	July 2023
Haloacetic Acids (HAA5)	2 sample every year	1	July 2022	July 2023

What is being done?

The subsequent samples will be pulled in accordance with ADEQ rules in July 2023.

For more information, please contact Jason Long at 520-431-7723 or PO Box 85160, Tucson, AZ .

Please share this information with other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
